Rodrigo Felipe de Oliveira **Pena**

Post-Doctoral Research Associate ·
Federated Department of Biological Sciences · New Jersey Institute of Technology and Rutgers University
Newark, New Jersey, NJ 07102, USA
(+1) 347-825-6540 | pena@njit.edu | rfdopena | 0000-0002-2037-9746

Education

USP(University of São Paulo) — *Ribeirão Preto, São Paulo, Brazil*
Ph.D. in Physics Applied to Medicine and Biology — *Feb. 2014 - Dec. 2018*

HUB(Humboldt Universität zu Berlin) — *Berlin, Germany*
Visiting Ph.D. student, International Research Training Group IRTG 1740 — *Sept. 2015 - Oct. 2016*

EPFL(École Polytechnique Fédérale de Lausanne) — *Lausanne,Switzerland*
Research Internship and exchange studies — *Mar. 2012 - Feb. 2013*

USP(University of São Paulo) — *Ribeirão Preto, São Paulo, Brazil*
B.S. in Medical Physics — *Mar. 2009 - Dez. 2013*

UNASP(University Center Adventist São Paulo) — *Hortolândia, São Paulo, Brazil*
Technical Education in Computer Science — *Feb. 2005 - Dez. 2007*

Honors & Awards

2022	**Poster award winner**, 17th Annual Conference on Frontiers in Applied and Computational Mathematics	*New Jersey, USA*
2019	**Honorable Mention for Ph.D. Thesis due to its excellent quality**, Graduate Program in Physics Applied to Medicine and Biology (FAMB)	*São Paulo, Brazil*
2018	**Travel Award CNS*2018**, Conference Organization For Computational Neuroscience (2018)	*Seattle, USA*
2018	**Best project presented award**, LASCON – Latin American School on Computational Neuroscience (2018)	*São Paulo, Brazil*
2014	**John Roderick Cameron award**, Best student graduating with honors in Medical Physics	*São Paulo, Brazil*
2014	**Second best presentation award**, GCARI-RP meeting	*São Paulo, Brazil*
2012	**Best presentation award**, Brazilian Conference in Medical Physics	*São Paulo, Brazil*
2012	**Science Without Borders**, Brazilian scholarship to pursue one year of studies in Switzerland	*Lausanne*

Teaching experience & organization of scientific events

Invited lecturer for the course Introduction to Computational Neuroscience at NJIT 2022 — *Autumn 2022*

- Responsible for teaching Machine Learning.

Invited lecturer for the course Introduction to Systems Biology at NJIT 2022 — *Spring 2022*

- Responsible for teaching crash courses on Python and Machine Learning.

Information Theory on Neuroscience course at NJIT — *Fall 2021*

- Responsible for teaching a short course on Information Theory for neuroscientists.

Satellite workshop at the Bernstein Conference 2021 — *2021*

- Responsible for the organization and selection of speakers of the satellite workshop “Frequency-preference responses to external perturbations: from neurons to networks” at the Bernstein Conference 2021.

Satellite workshop at the Bernstein Conference 2018 — *2018*

- Responsible for the organization and selection of speakers of the satellite workshop “Resonance in neurons and neural networks: theoretical and experimental approaches” at the Bernstein Conference 2018.

Introduction to Computational Neuroscience — *2018*

- Responsible for a lecture in a 3 days Introduction to Computational Neuroscience course in the XLI Annual Meeting of the Brazilian Society for Neuroscience (SBNeC).

Numerical Methods for Differential Equations — *Autumn 2018*

- Teaching Assistant.

Tutorial course in Computational Neuroscience *2018*

- Responsible for a 2 days hands-on Computational Neuroscience course Satellite of the XLI Annual Meeting of the Brazilian Society for Neuroscience (SBNeC).
- Course available at sisne.org/eventos/pcn2

Tutorial course in Computational Neuroscience *2017*

- Responsible for a 2 days hands-on Computational Neuroscience course Satellite of the XL Annual Meeting of the Brazilian Society for Neuroscience (SBNeC).
- Course available at sisne.org/eventos/praticoneuro

Tutorial course in Computational Neuroscience *2017*

- Responsible for a 5 days hands-on laboratory entitled "Neuro Mathematics" during the 4th Summer School on Intelligent signal processing for Frontier Research and Industry.

Physics II – Waves, Fluids and Thermodynamics *Autumn 2017*

- Teaching Assistant.
- Helped prepare lecture material and answered student questions for office hours.

Computational Physics *Spring 2015*

- Teaching Assistant.
- Helped prepare lecture material, graded students exercises, and answered student questions for office hours.

Biophysics II *Spring 2011*

- Teaching Assistant.
- Answered student questions for office hours.

Physics I – Classical Mechanics *Spring 2010*

- Teaching Assistant.
- Answered student questions for office hours.

Mentoring activity

UFSCAR

Joao Victor Russo Izzi (Undergrad research project) *2022*

- Effective connectivity between neurons. Co-supervised with Prof. Ricardo Felipe Ferreira.

UFSCAR

Vitor Gomes Schiavone (Undergrad research project) *2022*

- Inference of neuronal connectivity and the model of Galves and Locherbach. Co-supervised with Prof. Ricardo Felipe Ferreira.

NJIT

Shiva Senthilkuma (Undergrad research project) *2021*

- Dynamics of Generalized Half-Center Oscillator Neuronal Networks.

NJIT

Nicholas Ramella (Undergrad research project) *2020*

- Biophysical characterization of auto- and cross-correlation from spiking neurons.

NJIT

Rajeev B Botadra (Undergrad research project) *2020*

- Characterization of auto- and cross-correlation from spiking neurons with genetic algorithms.

UFSCAR

Victor Augusto Girardi (Undergrad research project) *2020*

- Inference of neuronal connectivity via information theory measures. Co-supervised with Prof. Ricardo Felipe Ferreira.

USP

Joao Paulo Novato de Oliveira (Undergrad research project) *2017*

- Neuronal avalanches in hierarchical and modular cortical network models. Co-supervised with Prof. Antonio Roque.

Programming Languages & Environments

- Fluent in C/C++, Matlab, Python (including parallel programming with joblib and multiprocessing libraries).
- Simulation tools for neuroscience including Brian, Brian2 and NEURON.
- Machine learning and Deep learning python packages such as scikit-lean and PyTorch.
- Experience with LaTeX and UNIX-based systems.

Membership in professional organizations

- Society for Neuroscience
- Organization for Computational Neuroscience
- Brazilian Society of Neuroscience and Behavior

Peer review activity

- IEEE Access (reviewed 7 papers)
- Cognitive Neurodynamics (reviewed 4 papers)
- Entropy (reviewed 3 papers)
- Frontiers in Computational Neuroscience (reviewed 3 papers)

- Sensors (reviewed 4 papers)
- Mathematics (reviewed 2 papers)
- Algorithms (reviewed 1 paper)
- Symmetry (reviewed 1 paper)
- Brain Sciences (reviewed 1 paper)

Summary of scientific projects & collaborations

Post-Doctoral Research Associate (Supervised by Prof. Horacio G. Rotstein) *Newark, New Jersey, USA*

New Jersey Institute of Technology *2019 - PRESENT*

- Theoretical and computational research addressing neuronal mechanisms of generation of network resonance.
- Extracting information from neuronal spike-train cross-correlations with deep learning approaches.
- Supported by the National Science Foundation grant DMS-1608077 (HGR).

Collaboration with the Department of Statistics(Prof. Ricardo Felipe Ferreira) *São Carlos, São Paulo*

Federal University of São Carlos *2020 - PRESENT*

- Effective neuronal connectivity inference with information theory.

Ph.D project (Supervised by Prof. Antonio C. Roque) *Ribeirão Preto, São Paulo*

University of São Paulo *2014 - 2018*

- Activity propagation in hierarchical and modular networks of spiking neurons.
- Supported by a FAPESP Ph.D. scholarship (grant 2013/25667-8).

Collaboration with the Laboratory of Electrophysiology at the School of Medicine of Ribeirão Preto, University of São Paulo (Dra. Alexandra Cunha and Dr. Ricardo Leão) *Ribeirão Preto, São Paulo*

University of São Paulo *2017 - PRESENT*

- Modeling of synaptic properties from audiogenetic wistar rats.
- Application of computational methods in electrophysiological recordings.

Ph.D exchange project (Supervised by Dr. Michael Zaks) *Berlin, Germany*

Humboldt Universität zu Berlin *2015 - 2016*

- Self-sustained activity in hierarchical and modular networks with synaptic noise.
- Supported by a FAPESP Research Internships Abroad (BEPE) fellowship (grant 2015/09916-3).

Ph.D exchange project (Supervised by Prof. Benjamin Lindner) *Berlin, Germany*

Bernstein Center for Computational Neuroscience *2015 - 2016*

- Determination of second-order (power spectrum) spike-train statistics with an iterative scheme.
- Research under the scope of the International Research Training Group (IRTG) 1740.

Research internship project (Supervised by Dr. Christian Gaumier) *Lausanne, Switzerland*

École Polytechnique Fédérale de Lausanne *2012 - 2013*

- Modeling diseases propagation using graph theory.
- Supported by the Science without Borders fellow (CNPq).

Undergraduate scientific project (Supervised by Prof. Antonio C. Roque) *Ribeirão Preto, São Paulo*

University of São Paulo *2010 - 2013*

- Self-sustained activity in cortical networks of spiking neurons.
- Supported by a FAPESP scholarship for undergraduate students (grant 2011/06806-1).

Undergraduate scientific project (Supervised by Prof. Lauro Wichert Ana) *Ribeirão Preto, São Paulo*

Clinics Hospital of Ribeirão Preto *2009 - 2010*

- Integration of different institutional databases: acquisition of medical-hospital equipment, confrontation and correction of inconsistencies, and search for clinical evidence for technical-scientific advice.
- Supported by a FAEPA scholarship.
